

October 1, 2007

TO: Members, Urbana Firemen's Pension Fund

FROM: Ronald Eldridge, Treasurer Am E.

Attached please find the annual financial report and audit for the Firemen's Pension Fund for the fiscal year ended June 30, 2007. Some important points of the audit are:

- 1) The financial statements have been prepared in accordance with generally accepted accounting principles ("clean opinion"). The auditor's opinion letter on this finding is on page 1.
- 2) In performing their work, the auditors did not discover any significant weaknesses in the fund's internal accounting controls. It is the policy of the auditor that no separate letter is issued in this circumstance.
- 3) Net worth of the fund increased \$2,830,080 to \$27,767,593 (an 11.3% increase). Last year's increase was \$1,101,869 (4.6%) and \$1,767,376 (8.0%) the year before. A comparison of the components of the increase in fund balance compared to last year follows:

| | Increase Over Last Yr. | % Increase | % <u>Total Rev.</u> . |
|------------------------------|---------------------------|---------------|--------------------------|
| Employer Contributions | \$(51,270) | - 5.0% | 22.4% |
| Employee Contributions | 10,474 | 4.2% | 10.2% |
| Member Repayments (Ballew) | - 32,710 | n/a | n/a |
| Investment Income | 1,960,550 | 168% | 71.5% |
| Expenses | 158,833 | 11.5% | n/a |
| Net Increase in Fund Balance | \$2,830,080 | 11.3% | n/a |

- 4) The city's annual contribution was based upon an actuarial study performed by the actuarial firm of Tim Sharpe. The amount required to be contributed by law by the City was \$795,816 (30% of salary). The fund policy is to request an amount that amortizes the accrued liability by a level dollar amount. This amount was \$983,570. The amount actually contributed by the City was \$980,754. On Page 13 is a detailed schedule of contributions made by the City for the last 10 years. Firefighters contribute 9.455% of their salary into the fund, which totaled \$262,735 (ratio of city contributions to employees was approximately 3.7 to 1). The amount to be contributed by the City for next year is \$930,360 and the amount that will be contributed by the City is \$965,300.
- 5) The fund is at a 81.8% funding level. Last year the fund was at a 80.9% funding level. A detailed schedule of funding level over the last 10 years is shown on page 12.

- 10) Benefits: Listed below is a general description of the formulas used to calculate benefits. (The following is provided as a general picture and should not be used to actually calculate a person's benefits):
- Regular Retirement Pension. Firefighters attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the salary at the date of retirement. The pension shall be increased by .208% for each month of service over 20 years, to a maximum of 75% (reached at 30 years of service). Employees with at least 10 years, but less than 20 years of credited service, may retire and receive a reduced benefit at age 60 (on a graduated scale 10 years service = 15%, 15 years service = 30%, 19 years service = 45.6%). Upon reaching the age of 55, a regular pension is increased .25% for each month retired (up to a maximum of 15%), and 3% annually thereafter each January 1. For example, a company officer retiring with 25 years of experience would receive 62.5% of his final salary.
- <u>Disability Pension</u>. A firefighter that is unable to perform his or her duties due to a duty related injury is entitled to receive an annual payment of 65% of the salary at the date of disability. A firefighter that is unable to perform his or her duties due to an injury not related to the job is entitled to an annual payment of 50%. Upon reaching the age of 60, a disability pension is increased 3% of the original pension annually.
- <u>Survivor Pension</u>. If a firefighter dies on duty, the surviving spouse receives pension equal to the salary of the firefighter. If a firefighter dies due to reasons not related to duty, the surviving spouse assumes firefighter's pension.
- 11) The cost of benefit increases are expected to increase over time. Most members drawing benefits by law receive a 3% annually compounded increase in addition to increases in the number of retirees and the increased salaries at retirement that these benefits are based on. Total benefit costs increased 6.2% in 2006 compared to 2005 and have averaged an annual 5.0% increase over the last 3 years and 5.8% over the last 10 years. An examination of the total amount paid out for benefits shows the following amounts over last 3 years and 10 years ago:

| | 2007 | 2006 | <u>2005</u> | 1998 |
|------------|-------------|-------------|-------------|-----------|
| Disability | \$185,834 | \$197,657 | \$196,015 | \$139,469 |
| Service | 1,134,561 | 1,045,733 | 1,010,475 | 681,029 |
| Dependent | 132,219 | 123,997 | 103,544 | 68,952 |
| Total | \$1,452,614 | \$1,367,387 | \$1,310,034 | \$889,450 |

12) An examination of the number and make up of members receiving benefits provides insight into certain trends and changes affecting previous and future pension costs:

| | | Dis | sability | | | Serv | ice | | | Depende | nt |
|--------------|--------|-------------|---------------------|--------------------|----------|----------|--------------------|------------------------|----------|--------------------|---------------------|
| | # | Ave. Age | Serv. <u>Yrs</u> | Ave. Ben. | <u>#</u> | | Serv <u>Yrs</u> | . Ave. <u>Ben</u> . | <u>#</u> | Ave. <u>Age</u> | Ave. <u>Ben.</u> |
| 2007 2006 | 7 8 | 60 60 | | \$2,066 \$1,999 | 34 33 | 64 63 | 24 24 | \$2,882 \$2,767 | 8 8 | 77 76 | \$1,377 \$1,361 |

- In 2007, one firefighter retired (Burgess), 2 firefighters resigned (R. Smith with 5 years and 2 mos. service and R. Overton with 10 mos. service and withdrew their contributions), and 4 new firefighter was admitted into the fund (S. Doggett age 24, M. Jannusch age 23, J. Orr age 22, and M. Richey age 32). In the last 10 years (since 1998), the age of current firefighters has decreased one year from 40 to 39. The average years of service is the same as 10 years ago (10.0 years to 10.6).
- The average salaries of firefighters for pension purposes increased 2.7% in 2007 over 2006. Over the last 5 and 10 years, the average salary in the fund has increased annually 3.8% and 5.3% respectively. The actuary assumption on salary increases is 5.25%.

INDEPENDENT AUDITORS' REPORT

To the Board of Trustees City of Urbana, Illinois Firemen's Pension Fund Urbana, Illinois

We have audited the accompanying statements of plan net assets of the City of Urbana, Illinois Firemen's Pension Fund, a fiduciary fund of the City of Urbana, Illinois as of June 30, 2007 and 2006, and the related statements of changes in plan net assets, for the years then ended. These financial statements are the responsibility of the City's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits, in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described more fully in Note 1, the financial statements present only one fiduciary fund of the City of Urbana, Illinois and are not intended to present fairly the financial position and results of operations of the City in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly in all material respects, the plan net assets of the City of Urbana, Illinois Firemen's Pension Fund as of June 30, 2007 and 2006, and the changes in plan net assets, for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

The Schedule of Funding Progress and Schedule of Employer Contributions on pages 12 and 13, respectively, are not required parts of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Martin Hood Fried Cousents, Lec

The accompanying notes are an integral part of these financial statements.

Notes to Financial Statements June 30, 2007 and 2006

Note 1 - Summary of Significant Accounting Policies:

The Pension fund was organized on April 4, 1927, and is exempt from federal income tax. The pension fund is created and operated under state laws that provide for a fund to be established to provide certain retirement benefits to firefighters and their dependents (see Note 2). The fund is managed by a board of five trustees, made up of two persons appointed by the mayor of the City of Urbana and two persons elected from the current firefighters and one elected from the retired firefighters. The Pension fund is also included in the annual report of the City of Urbana, as a fiduciary fund, according to the criteria specified in governmental accounting standards.

Investments are reported at fair value. Fair values for U.S. government securities, stock mutual funds and money market accounts are based upon latest quoted prices. Investment transactions are reported as of the trade date. Interest income is recognized as earned. Realized gains and losses on sales and exchanges of securities and unrealized gains and losses are reported as net appreciation (depreciation) in the fair value of investments.

The fund considers all liquid investments with maturity of three months or less when purchased to be cash equivalents. At June 30, 2007 and 2006, there were no investments that were considered cash equivalents.

The fund is accounted for using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred. Employer contributions are primarily made from property taxes. Property taxes are recognized as revenues in the year for which they are levied. The 2006 levy is reported in fiscal year 2007 and the 2005 levy in fiscal year 2006. The taxes are certified against appraised real property as of the beginning of the previous calendar year. Benefits are recognized when the benefit is due and payable. Refunds are recognized when the employee resigns from employment with the city.

The preparation of financial statements requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions from plan net assets during the reporting period. Actual results could differ from those estimates.

Notes to Financial Statements June 30, 2007 and 2006

Note 2 - Pension Disclosure Information:

a. Plan Description:

The Pension fund is a defined benefit single-employer pension plan that covers all sworn firefighting personnel. Although this is a single-employer plan, the defined benefits and Illinois State Statues govern employee and employer contribution levels. This fund is accounted for and reported as a pension trust fund.

At June 30, 2007 and 2006, the pension plan membership consisted of:

| | 2007 | 2006 |
|--|-----------|-----------|
| Retirees and beneficiaries currently receiving benefits | 49 | 49 |
| Terminated plan members entitled to but not yet receiving benefits | 1 | 1 |
| Active vested plan members | 26 | 24 |
| Active non vested plan members | <u>23</u> | <u>24</u> |
| Total | <u>99</u> | <u>98</u> |
| Number of participating employers | 1 | 1 |

Following is a summary of the firemen's pension plan as provided for in the Illinois Statutes.

The firemen's pension plan provides retirement benefits as well as death and disability benefits. Employees attaining the age of 50 or more with 20 or more years of creditable service are entitled to receive an annual retirement benefit of one-half of the salary attached to the rank held at the date of retirement. The pension shall be increased by one-twelfth of 2½% of such salary for each month over 20 years of service, to a maximum of 75% of such monthly salary. Employees with at least 10 years, but less than 20 years of credited service, may retire and receive a reduced benefit which begins at age 60. The monthly pension of a firefighter who retires after January 1, 1977 with 20 or more years of service, shall be increased annually, following the first anniversary

Notes to Financial Statements June 30, 2007 and 2006

date of retirement, and paid upon reaching at least the age 55, by .25% of the original pension times the number of months the employee has been retired since age 50 (up to a maximum of 15%), and 3% annually thereafter of the pension payable at the time of the increase. The monthly pension of a firefighter who retires with less than 20 years of service receives an annual 3% increase.

During the year, covered employees were required to contribute 9.455% of their salary to the Firemen's Pension Plan. If an employee leaves covered employment with less than 20 years of service, accumulated employee contributions may be refunded without accumulated interest. The City of Urbana is required to contribute the remaining amounts necessary to finance the plan as actuarially determined by an enrolled actuary. By the year 2033, the City's contributions must accumulate to the point where the past service cost for the Plan is fully funded.

b. Funding Policy and Annual Pension Cost:

The amount shown below as the "net pension obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases and step-rate benefits, estimated to be payable in the future as a result of employee service to date. The measure is intended to help users assess the funding status of the system on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among employers. The measure is an accrued liability and is a component of the funding method used to determine contributions to the system. Administrative costs are paid for by the plan, except for in-kind donated financial services from the City.

The funding policy provides for actuarially determined periodic contributions at rates that, for individual employees, accumulate assets gradually over time so that sufficient assets will be available to pay benefits when due. The rate for the City's employee group as a whole has tended to remain level as a percentage of annual covered payrolls. The contribution rate for normal cost is determined using the entry age normal actuarial funding method. The system used a level percentage amount

Notes to Financial Statements June 30, 2007 and 2006

method to amortize the unfunded liability over a 40 year period. The significant actuarial assumptions used to compute the actuarially determined contribution requirements are the same as those used to compute the net pension obligation.

| Latest Actuarial Valuation Date | June 30, 2006 |
|---|------------------------------------|
| Asset Valuation Method | 5 Year Average Market Value |
| Significant Actuarial Assumptions: | |
| Rate of return on investment of present and future assets | 7.5% compounded annually |
| Projected salary increases | 5.25% compounded annually |
| Post retirement benefit increases | 3.0% interest annually |
| Inflation increases | 3.0% annually |
| Mortality | 1983 Group Annuity Mortality Table |
| Withdrawal | Graduated Rates |
| Disability | Graduated Rates |
| Retirement | Graduated Rates (100% by age 69) |
| Marital Status | 85% married, spouse same age |
| Plan Expenses | None |

| Annual Required Contribution | \$ 795,816 |
|---|--------------|
| Interest on Net Pension Obligation | 0 |
| Adjustment to Annual Required Contribution | 0 |
| Annual Pension Cost | 795,816 |
| Contributions Made | 980,754 |
| Increase (Decrease) in Net Pension Obligation | (184,938) |
| Net Pension Obligation, Beginning of Year | (747,616) |
| Net Pension Obligation, End of Year | \$ (932,554) |

There were no changes in any actuarial assumptions that would significantly affect the net pension obligation or the required contribution.

Notes to Financial Statements June 30, 2007 and 2006

Note 3 - Deposits and Investments:

As of June 30, 2007, the pension fund had the following fixed income or interest bearing investments and maturities:

| Investment <u>Maturities</u> | U.S. Govt and Primary Obligation <u>Agencies</u> | U.S. Govt. Implied Obligation Agencies | Certificates of Deposit | Fixed Income <u>Total</u> |
|--|--|---|----------------------------|---------------------------------|
| 0–5 Years: '\$ Amount '% Portfolio '% Policy Goa | \$ 3,293,556 I | \$2,204,507 | \$1,612,456 | \$ 7,110,519 55% 20% |
| 6-10 Years '\$ Amount '% Portfolio '% Policy Goa | 1,598,351 I | 1,729,419 | - | 3,327,770 26% 20% |
| 11–15 Years '\$ Amount '% Portfolio '% Policy Goa | 174,758 I | 2,074,911 | - | 2,249,669 17% 20% |
| 16–20 Years '\$ Amount '% Portfolio '% Policy Goa | 269,452 | - | - | 269,452 2% 20% |
| 21–25 Years '\$ Amount '% Portfolio '% Policy Goa | - I | - | - | - 0% 20% |
| Total | \$ 5,336,117 | \$6,008,837 | \$1,612,456 | \$12,957,410 |

Notes to Financial Statements June 30, 2007 and 2006

The fund also had the following stock equity mutual fund investments:

| Mutual <u>Fund Type</u> | Fair Value | %Total | Policy <u>Goal</u> | Policy <u>Min.</u> | Policy <u>Max.</u> |
|----------------------------|--------------|--------|-----------------------|-----------------------|-----------------------|
| Small Cap | \$ 823,943 | 6% | 5% | 5% | 20% |
| Active Equity | 5,421,291 | 39% | 40% | 25% | 40% |
| International | 1,404,144 | 10% | 10% | 5% | 15% |
| Mid Cap | 1,445,860 | 11% | 10% | 5% | 15% |
| Equity Index | 4,673,802 | 34% | 35% | 30% | 40% |
| Total | \$13,769,040 | 100% | | | |

<u>Interest rate risk</u>: In accordance with its investment policy, the fund manages its exposure to declines in fair values by 2 methods:

(1) Structuring the fixed income portion of the portfolio such that maturity dates are staggered so as to avoid an undue concentration of assets in a given time period. The fund investment policy has the following goals concerning maturity dates: 20% of the portfolio should have a maturity date of 0-5 years, 20% 6-10 years, 20% 11-15 years, 20% 16-20 years, and 20% 21-25 years. The investment policy recognizes that these percentages are only goals and that the Treasurer when purchasing an investment, has the flexibility to deviate from these goals if he deems that the interest rate available on investments with certain maturities does not make this purchase advisable. As illustrated above, the fund's investments are overweighted in the 0-10 year maturity levels and underweighted in the 11-25 year maturity levels. This is due to the fact that in the past few years, the interest rates on longer term maturities has been considerably lower than normal. The fund will continue to analyze each investment purchase in the near future and attempt to purchase investments with maturities above 10 years, if the interest rate on these investments makes this a prudent investment.

Notes to Financial Statements June 30, 2007 and 2006

(2) By diversifying the portfolio so that the impact of a potential drop in interest rates on a particular type of security will be minimized. The fund investment policy has the following goals concerning types of investments:

| | U.S. Govt. and Agencies | Certificates of Deposit | Stock Equity Mutual Funds |
|--------------------|----------------------------|----------------------------|------------------------------|
| % at June 30, 2007 | 42% | 6% | 52% |
| % Policy Goal | 50% | 5% | 45% |
| % Policy Minimum | 45% | 0% | 0% |
| % Policy Maximum | 100% | 10% | 45% |

At June 30, 2007, the investment in U.S. government and agencies is slightly below the policy minimum; the investment in stock equity mutual funds is 7% higher than the policy maximum (52% vs. 45%); and the investment in certificates of deposit is within policy minimum and maximum levels. The % of the portfolio in the mutual funds has exceed the policy maximum mainly due to increases in the market value of the mutual funds during the year. This increase in the market value is also responsible for the investment in U.S. government and agencies dropping below the minimum. It is the intention of management of the Fund to sell a portion of the stock equity mutual funds and reinvest these proceeds in U.S. Government and Agency investments, such that the value of the stock equity mutual funds and the U.S. Govt. and Agencies will be within policy maximum and minimums.

Credit Risk: The pension fund is limited by State Statutes and fund investment policy to invest only in obligations of the U.S. Government Treasury and its agencies, non-negotiable certificates of deposit, the Illinois Public Treasurer's Investment Pool, savings accounts, general and separate accounts of approved life insurance companies (up to a maximum of 10% of the fund's net assets), mutual funds (up to a maximum of 45% of the fund's net present assets or 35% if 10% is invested in general and separate accounts of approved life insurance companies) and money market mutual funds which are backed by U.S. government securities and agencies. Investments in U.S. Government securities and certain U.S. Government Agency securities are not considered to be of any credit risk since they carry the full obligation and guarantee of the U.S. Government. The fund has also invested in certain U.S. Government Sponsored Enterprises (G.S.E.) that are not secured by an explicit guarantee of the U.S. Government. One-hundred percent of these G.S.E. investments carry a AAA rating from Moody's and Standard and Poors. The fund considers the credit risk of

Notes to Financial Statements June 30, 2007 and 2006

all U.S. Government securities to be similar and does not distinguish these securities for purposes of policy goals, minimum and maximum investment levels. At June 30, 2007, the fund had \$45,713 invested in money market accounts. These money market accounts are not guaranteed and are not rated. The fund does not believe that the credit risk for these money market accounts to be significant in that the amounts invested are typically small. The investment policy limits any investment in a certificate of deposit to \$100,000. At June 30, 2007, the fund had \$6,456 invested in individual certificates of deposit above the \$100,000 limit. The fund does not believe that the credit risk for this \$6,456 to be significant in that all of these certificates of deposit mature in less than 6 months.

Concentration of Credit Risk: The only investments in any single security or organization that are in excess of 5% of the total investments or 5% of net assets (except for investments in U.S. Government and its credit guaranteed agencies and investments in certain mutual funds) is \$2,440,164 invested in the securities of the Federal Financing Corporation (FICO) which totals 9% of total investments and 9% of net assets; and, \$2,386,827 invested in the securities of the Federal National Mortgage Corporation (FNMA) which total 9% of total investments and 9% of net assets. These securities carry an implied U.S. Government guarantee. The fund considers the credit risk of these investments to be similar to investments in U.S. Government Agency securities that are explicitly guaranteed by the U.S. Government. Thus the fund does not believe a possible concentration of credit risk due to this investment is significant enough to address in the investment policies.

<u>Custodial Credit Risk for Deposits</u>: is the risk that in the event of a bank failure, the fund's deposits may not be returned. Deposits in federally insured banks and savings and loans are insured in an amount equal to \$100,000 for the fund plus an amount for each member's beneficial interest in the deposits, limited to an amount equal to \$100,000 divided by the largest beneficial interest percentage of a member. At year-end, the fund was not exposed to custodial credit risk for deposits as all deposits were insured.

<u>Custodial Credit Risk for Investments</u>: is the risk that in the event of the failure of the counterparty, the fund may not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The fund has no custodial credit risk in that all of its investments are insured.
