FOR IMMEDIATE RELEASE

August 3, 2018

### **2018 SURFACE SEAL STREET MAINTENANCE PROJECT**

The City of Urbana has contracted with Corrective Asphalt Materials, LLC to perform street maintenance on streets throughout the City of Urbana. The locations of streets to be worked on are shown on the attached map.

This work is scheduled to start Monday, August 6, 2018, and end Friday, August 10, 2018, weather permitting.

Traffic will be maintained at all times; however; periodic lane closures and driveway closures for 45 to 60 minutes can be expected the day of the work.

The Contractor will spray material onto the roadway that will then be covered with a blotter material such as sand or limestone. Please go slow through the sealed areas, as the material can be slippery and get onto vehicles. If the sealant does splash onto vehicles, it can be removed by immediately washing the vehicle with soap and water or by using a bug and tar remover. The City will sweep up the loose blotter material after the work is complete.

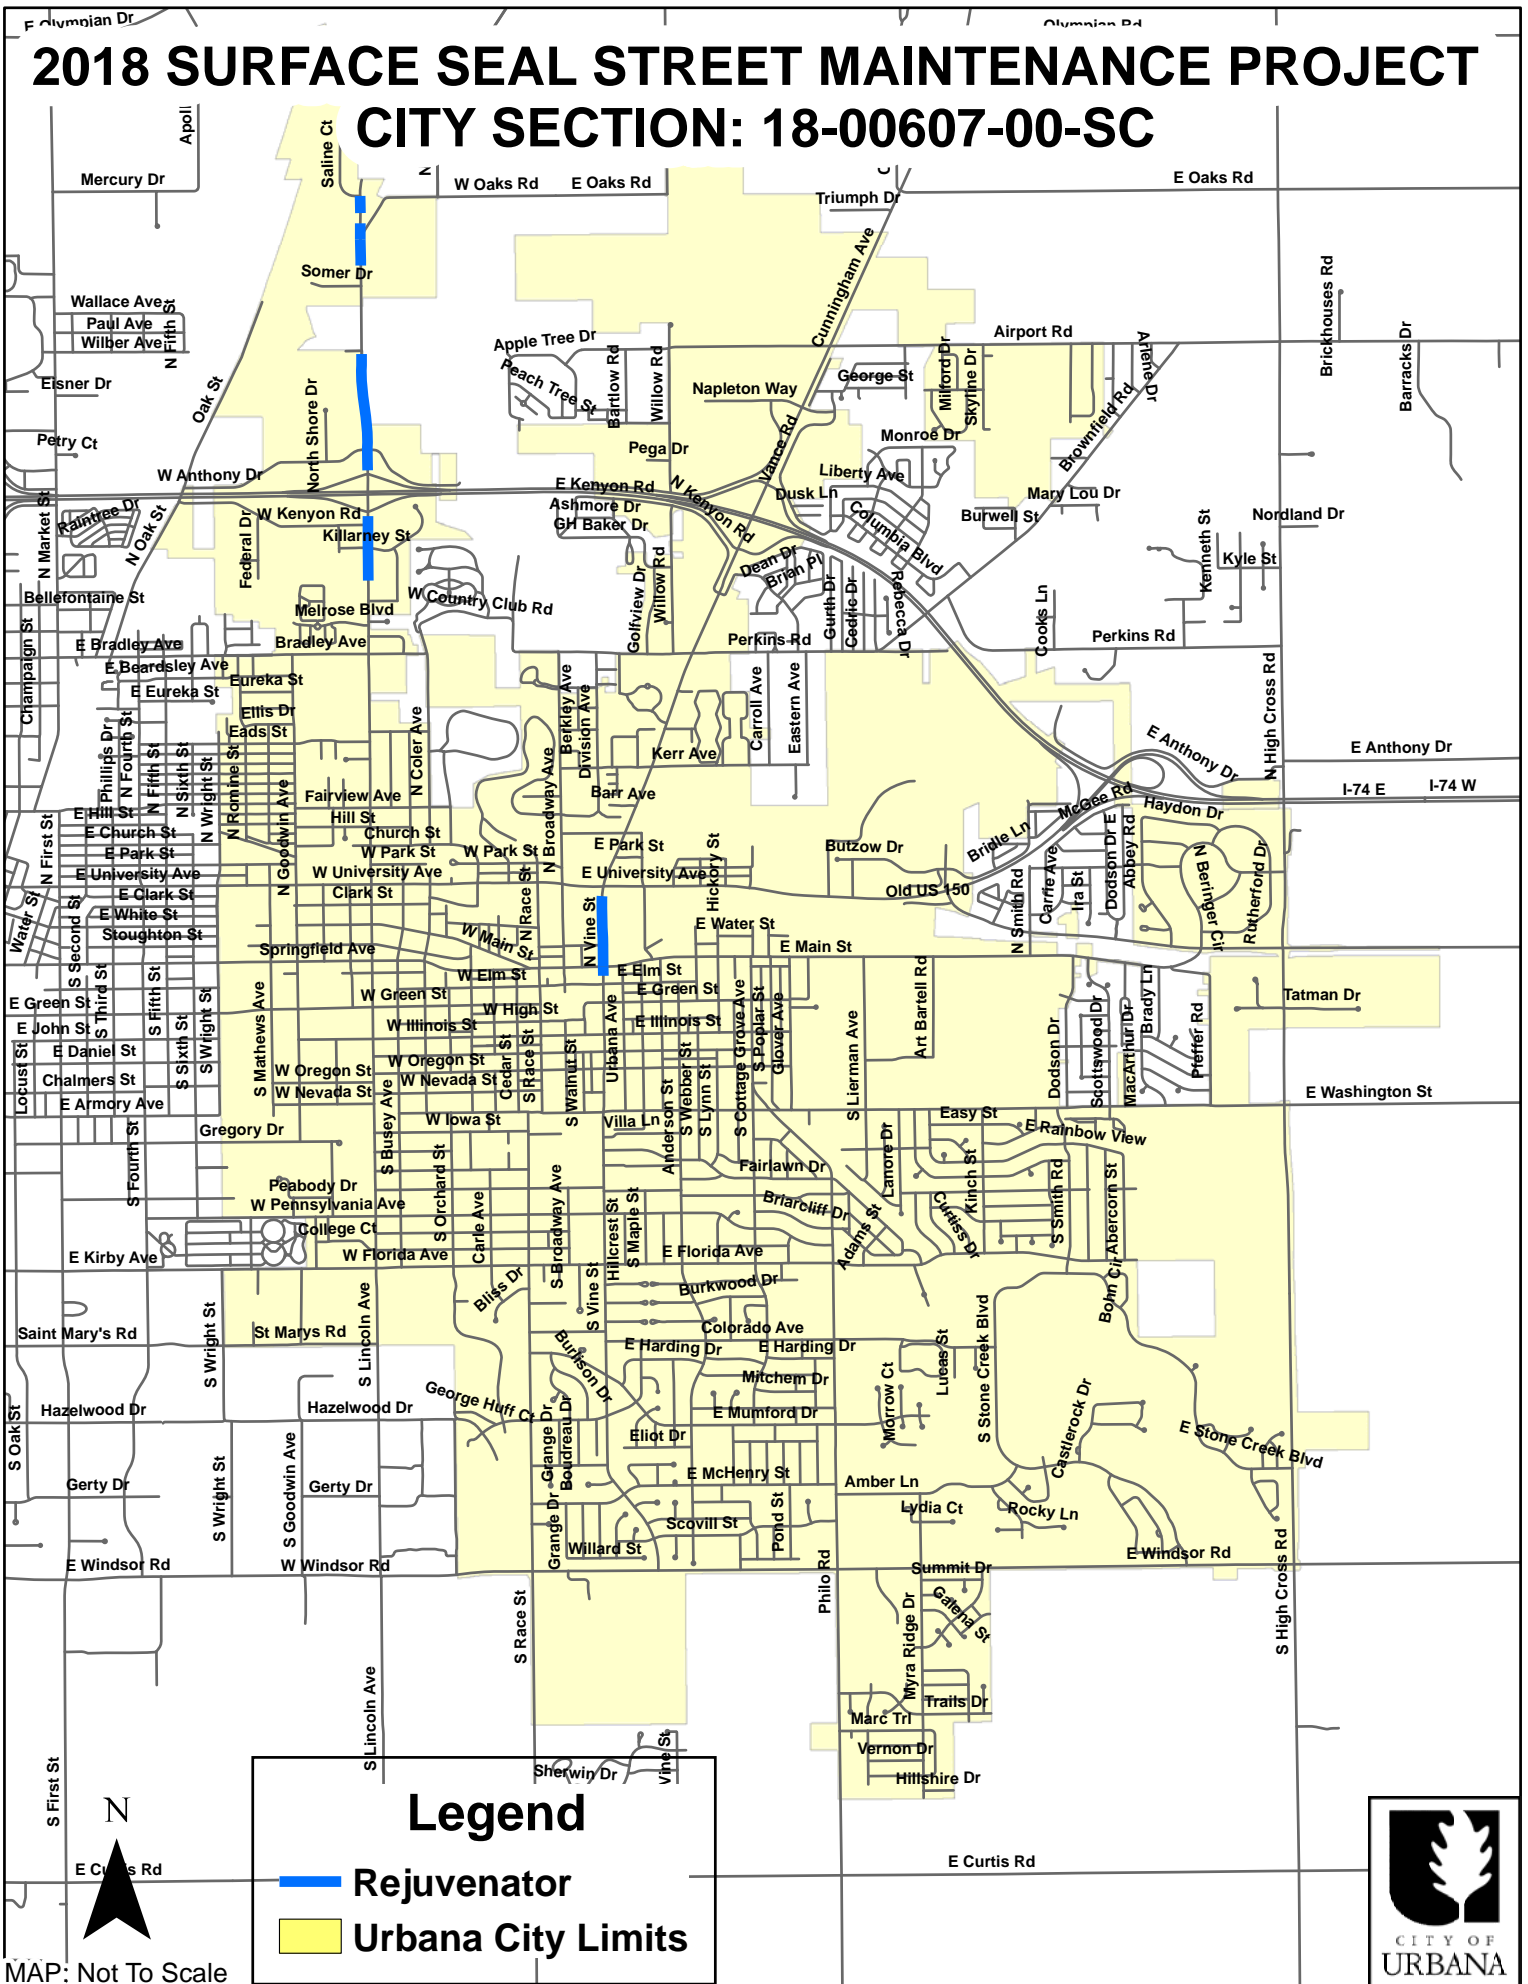

The project award amount of \$18,506.70 is funded with Local Gas Tax funds. This cost-effective maintenance treatment is being applied to extend the service life of newly improved asphalt pavements. For more information about this project, please visit <http://www.urbanaininois.us/projects>.
